He was engaged in dislodging a spruce tree, when it suddenly fell, crushing his leg until pleces of bone were forced through his clothing. An effort is being made to avoid amputation, and a hope of success is given out by the surgoon who attended the case.

Young Mr. Beverage is one of several laborers from Highland who has been overtaken by misfortune in the hazardous work of the woodsman's life. He is a worthy young man, highly esteemed by all who know him.

The streams of Southern and Western tourists pouring into Boston increase overy summer. crowded with merchants, bankers, professional men, rich planters and their families. Boston's electric railway system is more extensive and complete than that of any other city in the world. In her celebrated "subway" there are cars to take you to every town and seaside resort in New England. The people of Massachuseits are great lovers of antiquity. The Boston ari galleries are extensive and their exhibits of ancient sculpture and painting are simply bewildering to the average observer. In all the clies, towns and villages every place of historic in terest is marked by some imposing monument and every relic of colonial times is carefully preserved in some well-arranged and carefully managed museum. There is no action of our country where there is so much to interest and inspire the student of history and the lover of art. Thousands of people of moderate means come hither because the expenses of living and transportation are comparatively cheap. In Boston, or any of the surrounding towns, you can get a comfortable room and good table board for \$5 per week.

LONDON, August 1.—The sudden and stifling heat which overwhelmed London's millions last week brought with it such a plague of mosquitoes as the city has never before experienced.

Bome people whom mosquitoes have a liking for had their hands and faces distingured with swellings that surpassed the worst work of a wasp.

All the large public hospitals had mosquito cases among their out-patients on Saturday. The surgery album at Guy's showed twenty "bites" in the list of entries.

"We have mosquito cases every year," said the house surgeon yesterday, bome of the patients were quite blind for a time, and in the case of others their forearms had swollen all round in a painful manner. Several bables were badly bitten.
